COMPETITIVE ANALYSIS

COMPETITORS PLATFORM

/1 PLATFORMS like facebook, tiktok, fiver, instagram etc were made solely to connect or sell for europeans not africans..

/2 Due to poor level of education platforms like facebook, whatapp and instagram , are now used as surveillance tools to monitor and even restrict africans, while promising end-to-end data encryption by these platforms as fronties

/3 Unrealistic restrictions, account deletion and deprivment of specific features crippling the creator economic growth potential of the youth savvy populance across africa.

/4 promotion of illetracy and enocurgaing degeneracy in africa, as platforms like facebook, titktok, snapchap and instagram. tend to speedily boost illeterate creators while systematically delaying and fustrtating educated ones in africa.

/5 Poor access to foundational resource and tools.

CHAOS PLATFORM

/1 98 CHAOS differentiates itself by combining streaming, educational resources and earning potential in one platform. Unlike traditional platforms.
